

Grocery-delivery scenario

Initial state
groceries in shopping cart
at location of market

Goal state
groceries at front door
of the house

generalize

R1

specialize

$$E = G_i, d = C$$

grocery_transport

linear decomposition

Transport subproblems

generalize subproblem

P6

specialize

$$V = M, E = C$$

resolve

M moves C from $*_0$ to $*_1$

generalize subproblem

P8

specialize

$$V = M, d = C$$

resolve

M closes C 's doors
